All prices shown are monthly with the exception of installation charge. Prices do not include regulatory fees, surcharges and/or taxes. Gigabit is a maximum capacity. Speed is likely to be slower because transport overhead and other locations on the Internet are not yet gigabit-capable. Very few wireless routers support gigabit connection speeds. Gigabit speeds are "best-effort" and not guaranteed. Speeds in the 700 to 900Mbps range are most common on Gigabit tier.
