

Wataga Residents - We're bringing you Fiber!

September 1, 2020

Dear future Oneida Network Services customer,

My name is Troy Nimrick, and I am the General Manager of Oneida Network Services, headquartered just few miles down US Highway 34. I have some news that we are energized about and I think you will be too.

Two weeks ago, we began construction on a Fiber-to-the-Home communications system in Wataga. This phase of the project will take a few months, but we'd like to invite you to sign up for service now, so that when construction is complete late this fall, you will be one of the first customers we install.

I'm personally inviting you to contact our office at (309) 483-3111 or go to www.oneidatel.com/wataga to get an application, get answers to your questions or review our products and pricing. Plus, the \$50 installation fee will be credited on your first bill.

You might be wondering what a Fiber-to-the-Home system is and what benefits it brings to you. Please allow me to tell you a little about it, so you can be excited about it too.

Fiber-to-the-Home offers nearly unlimited capacity for Broadband Internet. We all learned how important reliable Internet is during the pandemic, and our needs are only going to grow. We also plan to bring TV and telephone services too – if you need them. The fiber network allows us to guarantee the Internet speed you will receive, and fiber offers superior reliability for Internet, TV and voice services.

The new fiber network we are installing will be capable of 1 Gigabit per second speeds (which is equal to 1,000Mbps) per customer. Rest assured it is extremely fast, exceptionally reliable, and very capable of allowing you to work, go to school, shop, play games or stream your favorite shows.

Please give us a call with your questions or sign up by calling (309) 483-3111.

Thank you for your time. We are delighted to be able to bring this advanced network to you, and all the services it allows us to offer you. We look forward to serving all your communications and entertainment needs.

Sincerely,

Troy Nimrick, General Manager
Oneida Network Services, Inc.
